

CLOUD HOSTING

SCALABLE SOLUTIONS BUILT FOR BUSINESS

The “cloud” is where business happens today. If you’re not working in the cloud, E Street wants to make sure you get up to speed and on your way to building a stronger, more efficient and connected business.

CLOUD VIRTUAL PRIVATE SERVER

E STREET’S
cloud-configured
VPS starter plans
from \$45/month

Example server configs:

1GB RAM	100GB Disk	1 CPU
2GB RAM	300GB Disk	2 CPUs
4GB RAM	500GB Disk	4 CPUs

Get your business up and running on the Web with a simple, straightforward cloud-based hosting plan for “yourdomain.com” and private email servers. All VPS configurations come with root level administration, unlimited bandwidth and unlimited domain names. Perfect for deployments of:

- Private mail servers/Hosted Exchange
- Windows Server Active Directory setups
- Content management systems: Joomla™, Drupal™, WordPress™, CRM
- File sharing/collaboration servers

DEDICATED PRIVATE CLOUD

E Street’s fully scalable dedicated servers—hosted by us and managed by your IT team

Remove the expense, complexity and worry associated with deploying on your own network infrastructure, data center or colocation. Let E Street host for you, leveraging our high-performance servers and virtualization to administer powerful cloud-based solutions tailored for your organization.

- Windows & Linux server platforms
- Custom configuration for your business
- Unlimited specifications
- Internet ready upon activation

CLOUD HOSTING

COLOCATION

E Street's private data center, ideal for small and enterprise customers

Manage and monitor your cloud-based business with E Street's highly secure and dependable server center, located right here in Denver. Our powerful, professional competitively priced "colo" infrastructure is backed by redundancy, security and proven performance you can count on.

- N+1 uninterruptible power
- Scalable bandwidth options
- Backup emergency power
- Full, half and third racks
- Controlled access & video security

THE POWER OF CLOUD COVER

The big benefit of an E Street cloud-based hosting solutions is you can control it, customize it and scale it for how you do business.

- Add/delete servers
- Clone, backup & enable CND
- Scale resources (memory, CPU, disk space) via control panel
- Power up/down
- Load balance

MORE CLOUD QUESTIONS

Bandwidth: Data coming in to your cloud server is free. For outgoing data, the first 5GB/month is included. Additional data transfer is billed at low rates with unlimited data transfer.

Billing: All cloud server resources are billed hourly, allowing users to dynamically scale resources as needed. Cloud servers in an "off" state are not billed for active resources, only for storage.

Business apps: Ask us about pre-built cloud applications customized to boost business productivity: Windows Server Essentials (SBS), Hosted Exchange, CMS, E Street DataSafe offsite backup and collaboration servers.

Why E Street?

After more than 20 years, our customers have come to trust E Street's robust, private data center to secure and monitor our exclusive hosting solutions. While we employ an enterprise-grade backend, the front end of our business remains locally focused and honestly accountable to the shifting business needs of our loyal customers.
